

CENTRE FOR UROLOGICAL CARE AT THE PRINCESS GRACE HOSPITAL

Rapid urological diagnosis and treatment planning

The Centre for Urological Care at The Princess Grace Hospital specialises in all conditions affecting the urinary tract and male and female reproductive systems. Our clinics provide same- or next-day appointments with a specialist, while on-site state of the art imaging allows rapid diagnoses and treatment plans to be formulated in collaboration with the patient.

The Princess Grace was the first hospital in the UK to embrace robotic technology for the treatment of prostates cancer and we remain at the forefront of innovation and technology. Our diagnostic and imaging tests include the most up-to-date urine and blood tests performed in our fully accredited HCA UK laboratories, as well as a vast array of modern imaging technologies supported by dedicated and renowned uro-radiologists. Your consultant will have access to all the most appropriate investigations necessary to provide an accurate diagnosis for you in a safe and modern environment.

THE PATIENT JOURNEY

Patient has urinary incontinence, a urinary tract infection, kidney stone, urinary symptoms or urological cancer.

They book an appointment with a consultant urologist.

Consultant recommends and arranges any imaging or diagnostic tests, and involves any related specialists.

The patient's visit begins and they have their tests

These tests help the consultant to plan a course of treatment which may or may not involve surgery.

Patient agrees treatment plan with consultant and other specialists, and treatment can begin.

Urology MAC Lead for The Princess Grace Hospital

Mr Christian Brown is the urological MAC lead. Mr Brown offers care in both general and specialist urology. His general urology practice involves the assessment and management of general urological conditions including those of the kidney, bladder, prostate and male genitalia.

His specialist urology practice involves laparoscopic and robotic surgery, with particularly extensive experience in robotic-assisted radical prostatectomy (RARP), having over 1250 cases under his belt.

Mr Christian Brown

Consultant
Urological Surgeon

Kidney Stones Clinic

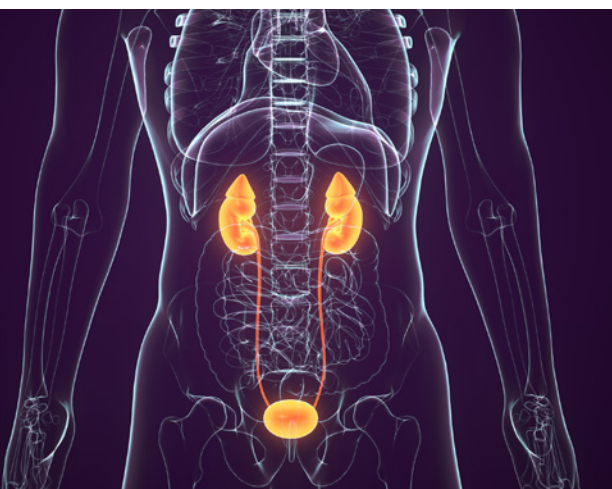

Our multidisciplinary teams work together to establish an accurate diagnosis of a patient's condition in order to tailor the treatment to each individual, utilising state of the art imaging and pathological investigations. Imaging and investigations are carried out onsite so we can offer patients fast, and often same day, management plans. We also have the facility to access existing images that have been performed elsewhere. We have ready access to our dedicated operating theatres at The Princess Grace Hospital, fully equipped with the most up-to-date technologies to achieve safe and effective outcomes for patients requiring surgery.

The Prostate Centre

Our multidisciplinary teams work together to establish an accurate diagnosis of a patient's condition in order to tailor the treatment to each individual. We use blood and urine tests in combination with the most up-to-date imaging technologies. All of these are available onsite so we can offer patients fast, and often same day, diagnostic tests. We can also review existing images that have been performed elsewhere.

One-Stop Prostate Clinic

London's first dedicated private clinic offers fast, same-day testing and diagnosis of prostate conditions for those with an elevated prostate-specific antigen (PSA). Patients are also offered a same-day consultation with one of our leading urologists to discuss their results and treatment plan.
